

Mithulram G

AI-Oriented Software Engineer | Backend, Cloud & Mobile Developer | M.Sc. Informatics Student

Passau, Germany | gmithulram@gmail.com | +91-9500539218 | German A2 | Student visa | 20 h/week
Portfolio: <https://mithulram-portfolio.vercel.app/> | GitHub: <https://github.com/mithulram>
LinkedIn: <https://www.linkedin.com/in/mithulram-g-926ba520a/>

EXECUTIVE PROFILE

Master's student in Informatics at the University of Passau with 3+ years of professional software development experience across Java/Spring Boot backend services, Flutter mobile products, Firebase integrations, Azure cloud tooling, REST APIs, SQL, and CI/CD-oriented delivery. Strong direction toward AI solutions architecture: combining scalable backend systems, cloud architecture, mobile product engineering, and AI/ML-ready software foundations.

ROLE-ADAPTIVE ATS KEYWORD LAYER

Java	Spring Boot	REST APIs	SQL
Flutter	Dart	Firebase	Azure
Azure DevOps	CI/CD	Python	Algorithms
Microservices	API Design	Cloud Architecture	AI/ML Foundations
TensorFlow/Keras Fundamentals	Agile	BLoC	GetX

TECHNICAL SKILLS

Backend	Java, J2EE, Spring Boot, REST APIs, SQL, Microservices, API Design, integration workflows
Mobile / Frontend	Flutter, Dart, Firebase, responsive UI, MVVM, MVC, BLoC, GetX, clean architecture
Cloud / DevOps	Azure Services, Azure DevOps, Azure CLI, CI/CD Pipelines, cloud architecture, hybrid cloud concepts
AI / Data	Python, algorithms, data handling, A* search, backtracking, ML foundations, TensorFlow/Keras fundamentals
Engineering	Object-Oriented Programming, functional programming, Agile delivery, testing awareness, system design basics

PROFESSIONAL EXPERIENCE

Junior Developer | Xmplar, Bangalore, India | Dec 2021 – Aug 2024

- Tripled data-handling efficiency through process optimization, cleaner implementation flows, and improved backend/mobile delivery.
- Designed and implemented responsive Flutter interfaces, contributing to a 20% increase in user engagement.
- Built and maintained Java/Spring Boot, REST API, SQL, and Flutter functionality across production-facing workflows.
- Implemented turn-by-turn location tracking, Firebase Analytics, Crashlytics, push notifications, dynamic links, and referral flows.
- Engineered referral functionality using deep links and dynamic links, supporting a 50% boost in user engagement.
- Worked across product requirements, UI delivery, backend integration, debugging, release readiness, and user-experience improvements.

Backend Intern | Adpay, Chennai, India | May 2020 – Jul 2020

- Developed REST API functionality using Java and Spring Boot for an Android distributor application.
- Supported backend implementation, testing, and integration in a small product engineering environment.

EDUCATION & CERTIFICATIONS

M.Sc. Informatics	University of Passau 2024 – present Passau, Germany AI Engineering / software systems focus
B.Sc. Computer Science – IT	SRM University 2018 – 2022 Chennai, India CGPA 7.8/10
Certifications	Java SE 11 Developer; PCAP Python Certified Associate; Microsoft Azure Solutions Architect Expert; Microsoft Azure Administrator; Certified C++ Advanced; LinkedIn Google Analytics
Languages	English, Tamil, German A2

PORTFOLIO PROJECT HIGHLIGHTS

Selected portfolio work showing production mobile development, Firebase-backed workflows, Flutter package design, clean architecture, and algorithmic Python foundations. Full portfolio: <https://mithulram-portfolio.vercel.app/>

CoverMe | Mobile Application

Flutter, Firebase, location services, authentication, video profile uploads, payment/invoicing workflows

- Fitness and wellness workforce management platform for venues to find cover instructors quickly across multiple regions.
- Portfolio describes ultra-fast instructor matching, cover requests, real-time coordination, profiles, rewards, and invoicing workflows.
- Strong evidence for production mobile, Firebase, location-aware features, marketplace workflows, and user-centric product delivery.

Link: <https://play.google.com/store/apps/details?id=com.coverme.fitness.instructor>

NeoMart Consumer App | eCommerce Mobile Application

Flutter, Firebase, push notifications, chat support, real-time delivery tracking, secure payments

- Consumer eCommerce platform connecting users with local markets and stores for groceries, medicines, and everyday products.
- Includes real-time communication with shopkeepers, order updates, delivery tracking, secure payment support, and chat assistance.
- Relevant for roles involving mobile commerce, customer-facing products, Firebase integrations, and scalable feature delivery.

Link: <https://apps.apple.com/in/app/neomart/id1519575784>

Remote Cursor Package | Flutter Package

Flutter, WebSocket communication, gyroscope/touch input, package design

- Mobile-to-desktop cursor controller using touch gestures or gyroscope movement with low-latency WebSocket communication.
- Demonstrates package-oriented thinking, real-time communication, device sensor usage, and configurable API design.

Link: https://github.com/mithulram/remote_cursor

To-Do List App | Clean Architecture Flutter Application

Flutter, BloC, clean architecture, local persistence, offline task management

- Task management app with create/update/delete workflows, priority levels, deadlines, reactive state management, and local storage.
- Useful evidence for maintainable Flutter architecture, state management, and offline-first mobile product patterns.

Link: <https://github.com/mithulram/TO-DO-List-application---Flutter>

Personal Portfolio | Flutter Web Application

Flutter Web, GetX, Responsive Builder, Flutter Map, EmailJS

- Responsive portfolio web app presenting projects, certifications, interactive maps, modern UI transitions, and contact integration.
- Shows web deployment, adaptive UI design, and personal product ownership from design to production.

Link: <https://github.com/mithulram/mithulram-portfolio>

ALGORITHMIC / AI-READY PROJECTS

- Sudoku Solver: Python backtracking solver with GUI/text interfaces, input validation, and step-by-step algorithm demonstration. Link: <https://github.com/mithulram/sudoku>

- A* Pathfinding Visualization: interactive Python shortest-path visualization with dynamic grids, obstacle placement, heuristic functions, and real-time path display. Link: <https://github.com/mithulram/A-Path-Finding-Visualization>

- Snake Game: terminal-based Python game with scoring, keyboard input handling, collision detection, and game-state management. Link: <https://github.com/mithulram/mithulram-python-snake-game-on-terminal>
